

KIT IDENTIFICATION MANUAL

INSTRUCTIONS:

1. Compare the vehicle roof with the images shown below in this document.
2. If the roof of the vehicle corresponds perfectly to the roof shown in one of the images, it is possible to install KOMPRESSOR III. **The kit to use is the one shown in the title of the image.**
3. If the roof is not among the images, there is not a standard application for that vehicle and therefore it will not be possible to install KOMPRESSOR III.
4. In case of any requests on the possibility of using a kit, contact the assistance providing photos of the roof, the inside and the outside of the cabin.

KIT ENCODER

ROOF CUT (INTERSPACE MIN.25MM.)

EXTRA INFORMATION: ROOF CUT

- Verificare gli spazi d'ingombro attorno all'unità e mascherina prima di effettuare il taglio.
- Il kit può essere installato soltanto su un **tetto a superficie piana** e con un intercapedine **minimo di 25mm.** così da permettere il corretto montaggio del telaio di fissaggio.
- Check the clearance spaces around the unit and the mask before making the cut.
- The kit can only be installed on a **flat surface roof** and with an air gap of **minimum 25mm.** so as to allow the correct assembly of the fixing frame.
- Verifique el espacio libre alrededor del equipo y del cubretapizado antes de realizar el corte.
- El kit solo se puede instalar en un **techo plano** y con un espacio entre el techo i tapizado de **mínimo de 25 mm.** para permitir el correcto montaje del marco de fijación.
- Vérifiez les espaces d'encombrement autour de l'unité et du masque avant d'effectuer la coupe.
- Le kit ne peut être installé que sur un **toit à surface plane** avec un interstice **minimum de 25 mm.** de manière à permettre le montage correct du cadre de fixation.
